

ACCESSORIES FOR BOATS

BORIKA

since  1999

BORIKA is a Ukrainian manufacturer of thermoplastic products for special purposes with 15 years of experience. The company produces plastic products of its own design for various applications. A significant part of the product model range is presented by the proprietary design of BORIKA engineers, which is confirmed by more than 30 international patents.

The production team constantly introduces innovative technologies of product development and improves the manufacturing methods to ensure that products can satisfy the highest requirements. Thanks to consistently high quality, extensive functionality and excellent consumer properties of products BORIKA earned a reputation as a progressive manufacturer and reliable partner. As a result, the company's products are in demand both on domestic and foreign markets. For instance, accessories for water transport which produced under the FASTen trade mark are successfully exported to European countries for more than 5 years.

Accumulated experience of designers and engineers, advanced equipment, adoption of the results of products' field testing, tracking of current global industry trends and participating in numerous international exhibitions - all of this confirms the exceptional status of BORIKA as a leading domestic manufacturer in its market segment.

Universal mount

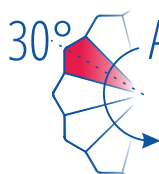

This unique mounting device allows for a quick and easy installation of the entire range of the FASTen® accessories on a watercraft. This universal mount offers exciting possibilities for equipping watercrafts of any type. It allows you to securely mount holders for rods, sonars, cameras and other accessories. It makes it possible to fix an awning, ladder, paddle, rope, anchor lock, navigation lights and other necessary equipment.

Devices and accessories installed in a watercraft with the help of the FASTen® universal mount can be easily removed and swapped.

The FASTen® mounting system is patented and has a number of advantages over foreign counterparts.

The mounting platform of the set is attached to a side in the selected place with four screws or self-tapping screws (supplied). The mount is fixed on the platform, following which the mount can hold various accessories of the FASTen® series.

FFr444 Mount with enlarged platform

for installation on hard surface (aluminium, plastic or wooden) mounting platform fits the rectangular seats of the most kayak brands. Furthermore, it can be installed on the Scotty mounting platforms: 341 Glue-On Mount glued on an inflatable side and 449 Portable Clamp Mount in place of 241 Combination Side.

Mount with platform for installation on tube

This mount kit is meant for self-installation of equipment and accessories on round rails or tubular railings (Ø 22, 25 mm) of yachts and powerboats and consists of the Fs219 mount and the Mr125 mounting platform.

Advantages:

- No drilling of the tube is required - it is fixed by crimping mechanism
- Easily rearranged from one tube to another for quick re-equipping of a watercraft
- Has locking screws that allow you to move the mount along the tube without detachment and, when tightened, prevent axial rotation of the mounting platform
- Allows you to remove and rearrange the mounted equipment without removing the mount with the platform.

Kardinal

FMr125**Mount with platform**

for installation on Ø22/25 mm tube

The set consists of the Fs219 mount and Mr125 mounting pad. It allows you to fit the mount on a tube of Ø 25 mm or Ø 22 mm with the use of rubber spacer.

Mount with platform for installation on C-shaped track

The set is designed for self-installation of equipment and accessories on a C-shaped track. It consists of the Fs219 versatile mount and the Ma mounting platform. Convenient for use in powerboats whose track faces the inner space of the watercraft. The mounting platform has two seats for the simultaneous accommodation of two mounts (one on each side of the platform) to save the usable space in a watercraft.

FMa

Mount with platform for vertical installation on C-shaped track (platform with additional option of installation of a second mount)

It is convenient for use in motor boats where the working surface of the C-shaped track faces the inner space of the watercraft.

Mount with mounting clip for installation on shaped tubes of up to 70 mm in diameter (platform with additional option of installation of a second mount)

The mount and mounting clip make it possible to secure pieces of equipment on a tube, railing, handrails, mast or track without drilling. Thanks to the elastic inner coating, the clip can clamp items of round, square and rectangular cross-section. The set includes a coupling bolt and nut to keep the clip closed and control the compression force. The clip has a provision for two Fs219 mounts (one mount is included in the set, the other one can be ordered separately).

The mounting clip can be used with items from 20 to 60 mm in volume.

Rod holder

1.03.001.01.01
1.03.001.01.02
1.03.001.01.03

This reliably secures a rod on the side of a watercraft. It provides full control over the process of fishing, has many adjustments and gives your watercraft a stylish look. Made of high strength plastic material withstanding heavy loads.

242*176*81 mm
330 g

Advantages of the holder:

- Equipped with a back stop that prevents rotation of the rod
- Can be installed in any position about its axis
- Has a locking ring to secure the rod reel, which prevents the loss of a fishing rod during trolling
- Allows you to adjust the inclination of the rod relative to the horizon.

Holder

with two mounts for action cameras or portable navigation lights

It secures a camera or Navisafe portable navigation lights in the Fasten universal mount. The advantage of the adapter is that it allows multiple accessories to be alternately fitted in the same mount. For example, in the daytime one can perform camera shooting while in the dark navigation lights can be fitted. Thus, the ease of use combines with saving valuable space onboard.

TOPEAK waterproof case holder for smartphones with tilt and swivel mechanism

1.09.001.01.01

133*79*53 mm

113 g

It quickly secures TOPEAK cases for smartphones and tablets in the mount. It is fitted in the Fs219 mount. It has a hole for the safety cord.

For the convenient use of a smartphone a provision is made for tilting and rotating the holder (in the axis of the mount and that of an accessory). The design allows you to adjust the viewing angle and secure the holder in the selected position.

This enables keeping your smartphone or GPS-navigator within immediate sight. The case protects the device from moisture, dust and mechanical damage while keeping the touch-screen unobstructed.

Caution! Do not leave the device in the case for a long time when it is exposed to direct sunlight or heat sources.

Platform for fishfinder and optional equipment

This is used to mount fishfinders of popular brands (Humminbird, Garmin, Lowrance, Raymarine and others) as well as mounting photo/video equipment, GoPro cameras,, video recorders and other equipment.

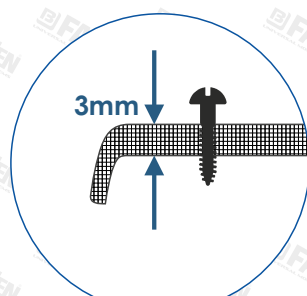

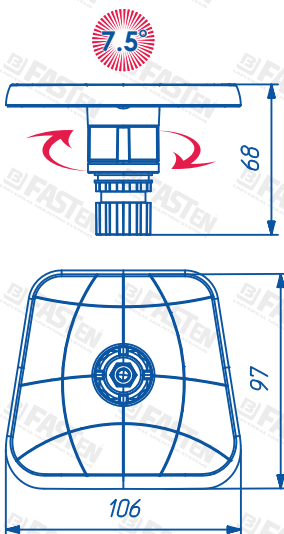

The platform is designed to fit the mounting holes of most types of equipment whose size fits that of the platform. To install equipment on the platform, standard fasteners are used. It is quickly installed and reliably secured in the universal Fs219 mount.

Fishfinder transducer arm mount

This allows for installation of a fishfinder transducer on a transom. It is fitted in the mount. The mechanism enables the arm to be adjusted for stiffness. With a watercraft on the move, in case of a collision with an obstacle the arm moves sideways, which helps to protect the transducer from damage.

Folding aluminum tube ladder

This ladder is fitted in two mounts spaced at 305 mm. The design has swivel joints that enable the ladder to follow the shape of an inflatable side and to fold it for storage or transportation.

Caution!!! To avoid tipping the boat, it is recommended to mount the ladder at stern or bow. If both the ladder and an engine/motor are mounted at stern, make sure that there is an adequate counterweight at bow.
